Q3 2018 Review: CEFXTR

Index Performance. The S-Network Composite Closed-End Fund Total Return Index (TICKER: CEFXTR) increased +1.93% from 2204.44 to 2246.89 in the quarter ended September 2018. The Barclays US Aggregate Total Return Index (TICKER: LBSTRUU) was up +0.02%.

As of September 30, 2018, the dividend yield for the index was 7.72%, compared with 5.77% at the end of the previous quarter. The weighted discount for the index was -7.57% as of September 30, 2018, compared with -6.66% at the end of the previous quarter.

The S-Network Composite Closed-End Fund Total Return Index (TICKER: CEFXTR) is up +2.05% in the past 12 months. This compares to a -1.22% decrease in the Barclays US Aggregate Total Return Index.

Index Description. The S-Network Composite Closed-End Fund Index (TICKER: CEFX) is a fund index designed to serve as a benchmark for closed-end funds listed in the US that principally engage in asset management processes seeking to produce taxable annual yield. The CEFX employs a modified net assets weighting methodology designed to assure accurate investment exposure across the various style segments that together comprise the taxable yield sector of the closed-end fund market. The CEFX is divided into three main closed-end fund sectors: a) Investment Grade Fixed Income Closed-End Funds; b) High-Yield Fixed Income Closed-End Funds; and c) Option Income Closed-End Funds.

Inclusion Criteria. All The CEFX contains closed-end funds selected from a universe of approximately 200 closed-end funds registered in the United States. All closed-end funds included in the CEFX must have as their stated objective one of three categories used to distinguish sectors: a) fixed-income; b) high yield fixed-income; and c) option income. The closed-end fund's stock must trade on a regulated North American stock exchange that issues a last closing price. The minimum capitalization value for any closed-end fund must be greater than USD 100 million and it must have an average daily turnover of more than USD .5 million per day for the three months prior to the announcement date to be eligible for inclusion. Constituents must have a total expense ratio of less than 2% per annum as of its most recent filing date. Closed-end funds that have traded at average premiums of 20% or more to their net asset values for ten business days prior to the last Friday of the month preceding the rebalancing date will be excluded from the index.

Weighting Methodology. The CEFX employs a weighting methodology based on total net assets, adjusted for each closed-end fund's average discount for the previous 90 days. Funds trading at discounts greater than the average discount of the constituents are accorded a higher weighting in the index, and funds that trade at a premium to the average have their weightings reduced. Any stock with a weight greater than 8% of the index will be capped at 8% and the excess weight will be redistributed on a proportional basis to the remaining stocks in the index. The total weight of stocks contained in the index with weights greater than 5% will be capped at 45%. Excess weights of stocks with weights over 5% will be reduced on a proportional basis and added to the weights of the stocks with weights under 5% on a proportional basis.

Rebalancing. CEFX is rebalanced and reconstituted quarterly, at the close of trading on the last business day of the rebalancing month.

Index Data. CEFX contains 137 constituents, and index values are distributed throughout the day at fifteen-second intervals in U.S. Dollars. CEFX is calculated on both a price only and total return basis. Daily values are available from December 31, 2005.
